Colour (5.25" Lovibond Cell) Max	1.5 Red	AOCS Cc 13b-45
Saponification Value	245-265	AOCS Cd 3-25

APPLICATIONS: It can be used extensively as frying oil in some regions where it is preferred as such. Physical blends and interesterfied mixtures of this product and other hydrogenated oils are processed into margarines and shortening. It is an excellent spray oil for crachers and cookies and is used as a creaming fat in biscuit cream. In the ice cream industry, this product is an excellent ice cream chocolate couverture fat.
